2009 ANNUAL

3/10/11
HB 486

Training Institute in Sexual Health Education (TISHE) core faculty and participants, 2009.

- SIECUS again partnered with Answer to hold the Training Institute in Sexual Health Education (TISHE). The week-long residential training institute focused on sexual health education was held in Connecticut in August 2009. All of the 33 spaces available were filled and this year's TISHE was one of our most successful to date.
- SIECUS staff began working with the District of Columbia Office of the State Superintendent of Education to sponsor a training institute for public and charter school teachers in the District based on the TISHE model. We expect this training institute will take place in 2010.

- In 2009, SIECUS' education staff reviewed the Health Education curriculum standards from the Great Falls, Helena, and Missoula (MT) school districts and provided feedback, suggestions for improvement, and ideas for further action to the Montana Partnership for Sex Ed Coalition.
